Helping all people live healthy lives

BD Integra™ Syringe

with *Retracting* BD PrecisionGlide™ Needle

How to Use the BD Integra™ Syringe

1. Attachment
Attach the BD Integra™ needle onto the BD Integra™ syringe with a push and a clockwise twist. If pre-attached, tighten the needle to the syringe prior to use.

2. Aspiration
Pull the shield directly off of the needle. Draw up medication in accordance with established protocol.

3. Injection
Administer medication in accordance with established protocol, making sure that all medication has been dispensed.

4. Activation
Push plunger rod to activate the safety mechanism. Depress until you sense two "clicks".

Activation can occur before or after the needle is withdrawn from the patient.

5. Needle Retraction
The needle will disappear into the syringe and the plunger will be recessed into the barrel when activation is complete.

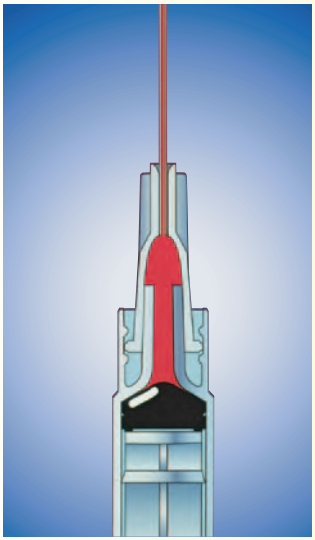

Discard immediately in the nearest sharps container.

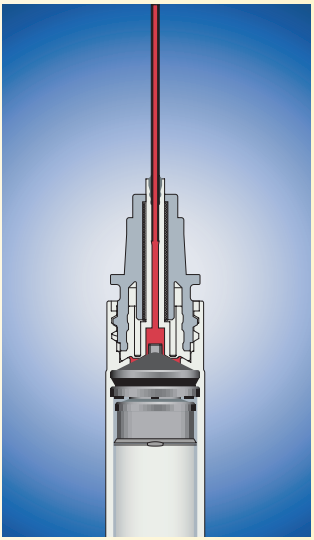

Don't Forget…
Aseptic technique and proper skin preparation of the site are essential. Follow your institution's policy for safe disposal of all medical waste.

Tru-Lok™ Technology helps to lower medication waste

The BD Integra™ Syringe, with Tru-Lok™ technology, is designed to have significantly lower waste space volume as compared to a traditional BD luer connection.* Less waste space can reduce drug wastage.

***** Data on file at BD

The BD Integra™ Syringe combines innovative technology with the BD quality and comfort you trust.

Prior to Activation

Single-Handed Activation

Tru-Lok™ Technology
Ensures low waste space and a reliable connection

Wide Flanges
For comfort and stability

Clear Barrel
For dosing accuracy

Detachable Needle

BD PrecisionGlide™ Needle Technology
Designed for patient comfort

After Activation

Needle Retracts into the Syringe!
Eliminates exposure to the needle after activation

The BD Integra™ Syringe Advantage

BD PrecisionGlide™ Needle Technology
- Designed for patient comfort
- Leading brand of hypodermic needle technology in the U.S.

Tru-Lok™ Technology
- Provides low waste space
- Creates a secure connection

Detachable Needle
- Allows clinicians to change needles for aspiration and administration

Safe, One-Handed Activation
- Retracting needle disappears into the syringe barrel
- Eliminates exposure to used needle
- Requires virtually no change in technique

Activation Choice
- Activates before or after needle is withdrawn from the patient
- Complete dosing is ensured prior to activation

The BD Integra™ Syringe is available in an array of sizes for all SubQ and IM injections.
